

Are you interested in having a lush garden growing outside your home?

Are you short on time or expertise in getting a garden started?

Would you like to find a basket of fresh organic vegetables and fruits on your back step each week?

Are you interested in helping to grow your local food system?

If so...

...We have a backyard farmer for you!

Backyard Harvest is a program of

Permaculture Research
Institute - Cold Climate
PO Box 22508
Robbinsdale, MN 55422
651.451.1716
harvest@pricoldclimate.org

Our other programs

- Workshops, skill shares and work shares
- Speakers

Backyard Harvest

Growing a sustainable
(and delicious)
local food system...

...one yard at a time!

About Backyard Harvest

Our backyard farmers can turn your very own yard into a bountiful garden to feed you or your whole family.

PRI's Backyard Harvest is a community-building program in urban permaculture. The program provides both garden fresh food and garden education for homeowners and neighborhoods as well as entrepreneurial and small-scale food production training for our farmers. Our farmers contract with homeowners and communities to create gardens in their backyards, maintain the gardens and harvest a fresh basket of produce weekly for each family.

About our farmers

Our farmers come with solid farming and/or gardening backgrounds. As Backyard Harvest farmers, they also receive ongoing training in whole systems (permaculture) design and other relevant skills such as composting, raised bed construction, soil building or pruning.

What we offer

- Experienced farmers
- Backyard farm designs
- Custom built food gardens
- Soil, compost, irrigation
- Weekly garden maintenance: growing inspection, weeding, planting
- Chemical-free growing methods with organic and heirloom plants
- Community-building educational opportunities
- Connection to local food networks and events in the Twin Cities

What you will need

- Yard space that receives at least 6 hours of sunlight per day
- A healthy appetite!
